Subject Index

- (1 + 1) EA
 - On the analysis of a simple evolutionary algorithm on quadratic pseudo-boolean functions, 61
- Algorithm
 - Efficient algorithms for Koblitz curves over fields of characteristic three, 113; Decomposition algorithms for the tree edit distance problem, 448
- Algorithm of Bafna and Pevzner
 - Improving the algorithm of Bafna and Pevzner for the problem of sorting by transpositions: a practical approach, 342
- Alignment
 - Decomposition algorithms for the tree edit distance problem, 448
- Annuli
 - Optimizing a constrained convex polygonal annulus, 1
- Approximate string matching
 - Indexing text with approximate q -grams, 157; Bit-parallel (δ, γ) -matching and suffix automata, 198; Bit-parallel approximate string matching algorithms with transposition, 215
- Approximation algorithm
 - On the approximability of the maximum induced matching problem, 79; A fully linear-time approximation algorithm for grammar-based compression, 416
- APX-completeness
 - On the approximability of the maximum induced matching problem, 79
- ATM networks
 - Virtual path layouts optimizing total hop count on ATM tree networks, 101
- Bioinformatics
 - Distributed suffix trees, 176
- Bit-parallelism
 - Bit-parallel (δ, γ) -matching and suffix automata, 198; Bit-parallel approximate string matching algorithms with transposition, 215; Practical algorithms for transposition-invariant string-matching, 267
- Boolean functions
 - On the analysis of a simple evolutionary algorithm on quadratic pseudo-boolean functions, 61
- Branch and bound
 - Practical algorithms for transposition-invariant string-matching, 267
- Coloring
 - Torpid mixing of the Wang–Swendsen–Kotecký algorithm for sampling colorings, 92
- Combinatorial algorithms
 - Constrained tree inclusion, 431
- Comparative genomics
 - Chaining algorithms for multiple genome comparison, 321
- Comparison of sequences
 - An improved algorithm for generalized comparison of minisatellites, 375
- Complexity analysis
 - On the analysis of a simple evolutionary algorithm on quadratic pseudo-boolean functions, 61
- Computational biology
 - Space efficient linear time construction of suffix arrays, 143; Decomposition algorithms for the tree edit distance problem, 448
- Consensus string
 - Hardness results for the center and median string problems under the weighted and unweighted edit distances, 390
- Cryptography
 - Efficient algorithms for Koblitz curves over fields of characteristic three, 113
- Cycle graph
 - Improving the algorithm of Bafna and Pevzner for the problem of sorting by transpositions: a practical approach, 342

- Damerau edit distance
 - Bit-parallel approximate string matching algorithms with transposition, 215
- Design and analysis of algorithms
 - Extracting approximate patterns, 293
- Deterministic automaton
 - More efficient left-to-right matching for overlapping pattern, 230
- Directed hypergraph
 - Partially dynamic maintenance of minimum weight hyperpaths, 27
- Distance-based methods
 - An exact and polynomial distance-based algorithm to reconstruct single copy tandem duplication trees, 362
- Distributed computing
 - Distributed suffix trees, 176
- Don't care character
 - Extracting approximate patterns, 293
- Duplication trees
 - An exact and polynomial distance-based algorithm to reconstruct single copy tandem duplication trees, 362
- Dynamic algorithm
 - Partially dynamic maintenance of minimum weight hyperpaths, 27
- Dynamic programming
 - Virtual path layouts optimizing total hop count on ATM tree networks, 101; An exact and polynomial distance-based algorithm to reconstruct single copy tandem duplication trees, 362; An improved algorithm for generalized comparison of minisatellites, 375
- Edit distance
 - Decomposition algorithms for the tree edit distance problem, 448
- Elliptic curves
 - Efficient algorithms for Koblitz curves over fields of characteristic three, 113
- Evolution reconstructions
 - An exact and polynomial distance-based algorithm to reconstruct single copy tandem duplication trees, 362
- Evolution strategies
 - On the analysis of a simple evolutionary algorithm on quadratic pseudo-boolean functions, 61
- Evolutionary algorithms
 - On the analysis of a simple evolutionary algorithm on quadratic pseudo-boolean functions, 61
- Exact algorithm
 - An exact and polynomial distance-based algorithm to reconstruct single copy tandem duplication trees, 362
- Fragment-chaining algorithms
 - Chaining algorithms for multiple genome comparison, 321
- Gene families
 - An exact and polynomial distance-based algorithm to reconstruct single copy tandem duplication trees, 362
- Grammar-based compression
 - A fully linear-time approximation algorithm for grammar-based compression, 416
- Hop count
 - Virtual path layouts optimizing total hop count on ATM tree networks, 101
- Index data structures
 - Constructing suffix arrays in linear time, 126
- Induced matching
 - On the approximability of the maximum induced matching problem, 79
- LCS
 - Hardness results for the center and median string problems under the weighted and unweighted edit distances, 390
- Least-squares
 - An exact and polynomial distance-based algorithm to reconstruct single copy tandem duplication trees, 362
- Levenshtein edit distance
 - Bit-parallel approximate string matching algorithms with transposition, 215
- Linear algorithm
 - List total colorings of series-parallel graphs, 47
- Linear-time algorithm
 - A fully linear-time approximation algorithm for grammar-based compression, 416
- List edge-coloring
 - List total colorings of series-parallel graphs, 47
- List total coloring
 - List total colorings of series-parallel graphs, 47
- Lossless data compression
 - A fully linear-time approximation algorithm for grammar-based compression, 416
- Markov chain Monte Carlo
 - Torpid mixing of the Wang–Swendsen–Kotecký algorithm for sampling colorings, 92
- MIDI music retrieval
 - Bit-parallel (δ, γ) -matching and suffix automata, 198
- Minimum evolution principle
 - An exact and polynomial distance-based algorithm to reconstruct single copy tandem duplication trees, 362

- Minimum weight hyperpath
 - Partially dynamic maintenance of minimum weight hyperpaths, 27
- Multiple alignment
 - Chaining algorithms for multiple genome comparison, 321; Hardness results for the center and median string problems under the weighted and unweighted edit distances, 390
- Music retrieval
 - On minimizing pattern splitting in multi-track string matching, 248
- Network design
 - Virtual path layouts optimizing total hop count on ATM tree networks, 101
- Noncrossing bipartite matching
 - Constrained tree inclusion, 431
- NP-complete
 - List total colorings of series-parallel graphs, 47; Hardness results for the center and median string problems under the weighted and unweighted edit distances, 390
- Offset
 - Optimizing a constrained convex polygonal annulus, 1
- Optimization
 - Optimizing a constrained convex polygonal annulus, 1
- Parameterized complexity
 - Hardness results for the center and median string problems under the weighted and unweighted edit distances, 390
- Pattern discovery
 - Extracting approximate patterns, 293
- Pattern matching
 - Space efficient linear time construction of suffix arrays, 143; More efficient left-to-right matching for overlapping pattern, 230
- Phylogenetic trees
 - An exact and polynomial distance-based algorithm to reconstruct single copy tandem duplication trees, 362
- Primitive pattern
 - Extracting approximate patterns, 293
- q -gram indices
 - Indexing text with approximate q -grams, 157
- Quadratic functions
 - On the analysis of a simple evolutionary algorithm on quadratic pseudo-boolean functions, 61
- Randomized algorithms
 - Torpid mixing of the Wang–Swendsen–Kotecký algorithm for sampling colorings, 92
- Range maximum query
 - Chaining algorithms for multiple genome comparison, 321
- Regular graph
 - On the approximability of the maximum induced matching problem, 79
- Rewriting system
 - More efficient left-to-right matching for overlapping pattern, 230
- Series-parallel graph
 - List total colorings of series-parallel graphs, 47
- Shortest paths
 - On minimizing pattern splitting in multi-track string matching, 248
- Sparse dynamic programming
 - On minimizing pattern splitting in multi-track string matching, 248
- String algorithms
 - Space efficient linear time construction of suffix arrays, 143
- String matching
 - Distributed suffix trees, 176; On minimizing pattern splitting in multi-track string matching, 248; Extracting approximate patterns, 293
- String matching (of music)
 - Practical algorithms for transposition-invariant string-matching, 267
- Strong matching
 - On the approximability of the maximum induced matching problem, 79
- Subtree homeomorphism
 - Constrained tree inclusion, 431
- Subtree isomorphism
 - Constrained tree inclusion, 431
- Suffix arrays
 - Constructing suffix arrays in linear time, 126; Space efficient linear time construction of suffix arrays, 143
- Suffix sorting
 - Space efficient linear time construction of suffix arrays, 143
- Suffix trees
 - Distributed suffix trees, 176
- Tandemly repeated sequences
 - An exact and polynomial distance-based algorithm to reconstruct single copy tandem duplication trees, 362
- Text databases
 - Indexing text with approximate q -grams, 157

- Time complexity
 - Improving the algorithm of Bafna and Pevzner for the problem of sorting by transpositions: a practical approach, 342
- Tolerancing
 - Optimizing a constrained convex polygonal annulus, 1
- Torpid mixing
 - Torpid mixing of the Wang–Swendsen–Kotecký algorithm for sampling colorings, 92
- Transposition
 - Improving the algorithm of Bafna and Pevzner for the problem of sorting by transpositions: a practical approach, 342
- Transposition invariance
 - On minimizing pattern splitting in multi-track string matching, 248
- Tree
 - Decomposition algorithms for the tree edit distance problem, 448
- Tree alignment
 - Hardness results for the center and median string problems under the weighted and unweighted edit distances, 390
- Tree inclusion
 - Constrained tree inclusion, 431
- Tree pattern matching
 - Constrained tree inclusion, 431
- Virtual paths
 - Virtual path layouts optimizing total hop count on ATM tree networks, 101
- Window nonadjacent expansion
 - Efficient algorithms for Koblitz curves over fields of characteristic three, 113
